Catalina and Olivia have been friends their entire lives, growing up in Fogg Lake. (Love that name!) An off the beaten path little community. A safe place to raise children that are gifted with shall we say

Cat and Olivia witnessed a murder when they were just teens. Now years later they're living outside of Fogg Lake, working together as private investigators. When Olivia vanishes it's up to Cat to track her down and bring her back home safely. Maybe even with a little help along the way from Slater, a member of the Foundation. That is, if she can convince herself to trust him.

This was a very quick read that kept me engaged throughout, though at times I felt I was missing a bit of a backstory to the characters and Fogg Lake.

Catalina Lark and Olivia Dayton were hiding in the cave in Fogg Lake when an explosion took place and as a result, they have what some might call â€œother sight.â€•

Now living in Seattle, Catalina and Olivia run a highly successful PI business, which is in part, due to their unusual talents. One night when Olivia is set to go on a date, she is kidnapped, leaving Catalina to try and find her best friend. Lucky for her, Slater Arganbright from the Foundation shows up to help. Talk about a distraction! No matter what Cat thinks of Arganbright, she needs all the help she can get if sheâ€™s going to find Olivia and goodness knows that Slater has a few special talents of his own. More than one if Cat is being honest with herself.

I must admit that I was quite intrigued with the idea of â€œother sightâ€• as I have always believed somewhat in the idea of people having psychic powers thus I was immediately drawn into this novel. The only drawback for me was that there were several characters whose backstories I felt like I was constantly missing, even though this was the first book in the series. Regardless, Ms. Krentzâ€™s writing was effortless and enjoyable and I would recommend it to any reader who has an open mind.

This was another buddy read with Kaceey!

Catalina and Olivia grew up in Fogg Lake where the town went through some sort of incident forty years back that left most with special/supernatural powers. They dont want to become lab rats or have scientists descend onto the town making it their personal laboratory.

residents try to keep the town off the radar from outsiders, knowing how most of the world views claims of paranormal activity or sensitivity. They don't want to become lab rats or have scientists descend onto the town making it their personal laboratory.

As teenagers, Catalina and Olivia witness a murder, though, there's no evidence and the town believe they just hallucinated the whole event, but in the present witnessing this murder leads to Olivia and Catalina running into danger, and Olivia goes missing. Determined to find her friend Catalina reluctantly accepts the help of the Foundation, an organization that knows of Fogg Lake and deals in the supernatural, both protecting and policing those with special powers. However, in the past the Foundation wasn't run by scrupulous individuals, so most aware of the paranormal community are wary of them. Slater Arganbright is one of the good guys, but Catalina doesn't trust him at first. That doesn't mean that the energies between them don't spark and collide, with a burning attraction between them, but still, Catalina wants to be careful.

They investigate with dangers thrown their way, together they keep each other safe. This was a thrill ride at times, with Catalina and Slater scrapping by. I thought this was an entertaining start to the Fogg Lake series, but still I had a bit of trouble with the pacing. I think explaining and establishing the ins and outs of this world slowed the pace for me. The book wraps up the immediate mystery, but there's more to come with the factions involved.

Hopefully their abilities will be able to save Olivia and will guide Catalina to her.
